Information Systems undergraduate pursuing **BSc (Hons) in Information Technology (Information Systems Engineering)**, currently in 2nd year. Skilled in translating business needs into clear requirements and data-driven insights. Experienced in requirements gathering, data analysis, system design, and cross-functional collaboration. Seeking internship opportunities in **Project Management or Business Analysis** to apply analytical and problem solving skills in real projects.

EDUCATION

BSc (Hons) in Information Technology Specialising in Information Systems Engineering in Information Technology

Sri Lanka Institute of Information Technology — Malabe, Sri Lanka • 10/2024 - 06/2028

CERTIFICATIONS

Foundations: Data, Data, Everywhere Google — 01/2026

Foundations of Business Intelligence Google — 01/2026

Introduction to Business Analysis IBM — 12/2025

Foundations of Project Management Google — 12/2025

PROJECTS

Telco Customer Churn Analysis — 12/2025 - 01/2026

This project is a **Power BI-based data analysis** designed to identify why customers leave a telecommunications company. By analyzing a dataset of **7,043 customers** , it monitors a **26.54% churn rate** and pinpoints high-risk factors like month-to-month contracts , fiber optic services , and manual payment methods. The final dashboard provides actionable insights to help management reduce revenue loss and improve customer retention.

FitVital Hub — 07/2025 - 10/2025

SLIIT

FitVital Hub is a role based health management platform built with Spring Boot and MySQL. It supports admins, doctors, dieticians, staff, and patients through secure dashboards for reports, appointments, diet plans, payments, and feedback. The system follows MVC with clear, scalable design. It includes a clean interface built with HTML, CSS and JS.

Tutor Management System — 02/2025 - 05/2025

SLIIT

TuitionConnect is a web platform that connects students with tutors. It supports registration, subject browsing, tutor search, and profile management. The system uses Spring Boot with an MVC structure and Tailwind CSS to deliver a clear and organized interface.
