## PROFESSIONAL SUMMARY

Information Systems undergraduate specializing in Information Systems Engineering with a strong interest in Project Management and Business Analysis. Skilled in requirements gathering, stakeholder communication, and coordinating tasks in Agile and Scrum environments. Experienced in translating business needs into actionable plans and data-driven insights using tools such as Power BI and SQL. Seeking a Project Management internship to support project delivery, team collaboration, and process improvement.

## SKILLS

**Business & Analysis Skills**
Requirements Gathering • Requirements Analysis • Stakeholder Communication • Business Process Analysis • Data Analysis • Problem Solving • Project Planning • System Design • Documentation

**Technical Skills**
SQL • Python • Data Visualization • Dashboard Development • Basic Statistical Analysis • MVC Architecture

**Tools & Technologies**
Power BI • MySQL • Jira • Trello • GitHub • Spring Boot • HTML • CSS • JavaScript

## EDUCATION

### BSc (Hons) in Information Technology (Information Systems Engineering)

Sri Lanka Institute of Information Technology — Malabe, Sri Lanka • 10/2024 - 06/2028

## PROJECTS

### Telco Customer Churn Analysis — 12/2025 - 01/2026

- Analyzed customer data using Power BI to identify key churn drivers across 7,000+ records.
- Developed interactive dashboards to track a 26.54% churn rate and highlight risk segments.
- Identified high-impact factors including contract type, service usage, and payment methods.
- Delivered data-driven insights to support customer retention strategies and reduce revenue loss.
- GitHub repo - https://github.com/Chami-03/telco-churn-analysis

### FitVital Hub — 07/2025 - 10/2025

- Designed and developed a role-based web application using Spring Boot and MySQL.
- Implemented MVC architecture to ensure scalable and maintainable system design.
- Built modules for appointment management, reporting, payments, and feedback systems.
- Collaborated on requirement definition and system workflows to align with user needs.
- GitHub repo - https://github.com/Chami-03/FitVitalHub

**Tutor Management System** 02/2025 - 05/2025

- Developed a web platform connecting students and tutors using Spring Boot and Tailwind CSS.
- Designed features for user registration, tutor search, subject browsing, and profile management.
- Structured system using MVC to improve usability and maintainability.
- Applied requirement analysis to define system features and user interactions.
- GitHub repo - https://github.com/Chami-03/TuitionConnect
