PROFESSIONAL SUMMARY

Information Systems undergraduate specializing in Information Systems Engineering with strong skills in business analysis, project coordination, and process improvement. Experienced in requirements gathering, stakeholder communication, and translating business needs into actionable plans and data-driven insights using tools such as Power BI and SQL. Comfortable working in Agile and Scrum environments, seeking an internship to contribute to project delivery, requirement definition, and solution implementation across business analysis and project management roles.

SKILLS

Business & Analysis Skills
Requirements Gathering • Requirements Analysis • Stakeholder Communication • Business Process Analysis • Data Analysis • Problem Solving • Project Planning • System Design • Documentation

Technical Skills
SQL • Python • Data Visualization • Dashboard Development • Basic Statistical Analysis • MVC Architecture

Tools & Technologies
Power BI • MySQL • Jira • Trello • GitHub • Spring Boot • HTML • CSS • JavaScript

EDUCATION

BSc (Hons) in Information Technology (Information Systems Engineering)
Sri Lanka Institute of Information Technology — Malabe, Sri Lanka • 10/2024 - 06/2028

PROJECTS

Smart Business Intelligence and Decision Support System — 03/2026

- Built a web-based BI system for data analysis, dashboards, and forecasting
- Gathered requirements and translated business needs into system features
- Developed dashboards and insights using Python, SQL, and Chart.js
- Enabled data-driven decision making through trend analysis and predictive models
- Live demo - https://smart-bi-system.onrender.com
- GitHub repo - https://github.com/Chami-03/smart-bi-system

Telco Customer Churn Analysis — 12/2025 - 01/2026

- Analyzed customer data using Power BI to identify key churn drivers across 7,000+ records.
- Developed interactive dashboards to track a 26.54% churn rate and highlight risk segments.
- Identified high-impact factors including contract type, service usage, and payment methods.
- Delivered data-driven insights to support customer retention strategies and reduce revenue loss.
- GitHub repo - https://github.com/Chami-03/telco-churn-analysis

FitVital Hub 07/2025 - 10/2025

- Designed and developed a role-based web application using Spring Boot and MySQL.
- Implemented MVC architecture to ensure scalable and maintainable system design.
- Built modules for appointment management, reporting, payments, and feedback systems.
- Collaborated on requirement definition and system workflows to align with user needs.
- GitHub repo - https://github.com/Chami-03/FitVitalHub

Tutor Management System 02/2025 - 05/2025

- Developed a web platform connecting students and tutors using Spring Boot and Tailwind CSS.
- Designed features for user registration, tutor search, subject browsing, and profile management.
- Structured system using MVC to improve usability and maintainability.
- Applied requirement analysis to define system features and user interactions.
- GitHub repo - https://github.com/Chami-03/TuitionConnect
